Using Diagnostic Equipment with Eyefinity EHR

Eyefinity EHR works with the diagnostic equipment connected to your computer to import readings into exams or display images that are managed by the equipment's image review software. In some cases, Eyefinity EHR can import information directly from the connected equipment. In other cases, Eyefinity EHR requires that the equipment's software be installed on the computer.

Refer to the *Eyefinity EHR Equipment Integration Guide* for information on installing and using specific pieces of equipment with Eyefinity EHR.

Installing the Equipment Interface

To install the Equipment Interface

This installer is for users of Eyefinity EHR where OfficeMate is not installed on the computer and where equipment interfaces will be used.

NOTE This installer may not run on Windows 8.1 Professional.

- 1. Navigate to the folder that contains the EHR Equipment Interface installer.
- 2. Double-click EHR_EI_Installer_12.0.3.exe.

The Welcome window appears.
